

Sixnet is pleased to offer an OEM-oriented software license to our partners looking to incorporate a web server enabled feature into their own products. This license provides for royalty free use of our "product ready" web server and the freedom to use or customize our I/O toolkit software as your own configuration and product maintenance tools.

Save many months (or years) of software development. Enhance your products performance with Sixnet feature-rich, optimized and mature firmware. Work less – achieve more. Get your product to market under budget and in record time.

PRODUCT HIGHLIGHTS
