

# Critical Equipment Monitoring

## Problem:

Keeping critical equipment such as generators and drilling equipment up and running

## Solution:

SIXNET's R.A.M. lets you control, monitor and locate your key equipment in real-time

## Benefits to you:

24/7 Monitoring - Instant notification of outages, and ability to reset/reboot devices remotely

Data Logging - Increased ability to predict usage, failures and schedule maintenance

GPS Location (future) - Always know where key mobile devices are to reduce theft and locate during emergencies (generators)
