

# Energy Conservation Remote Property Management

## Problem:

Lack of information from remote sites hinders ability to control power usage

## Solution:

SIXNET's R.A.M. connects you to key remote sites and equipment to manipulate their usage optimize energy costs / reduce carbon footprint

## Benefits to you:

Change Energy Usage in Real-Time - Better control of devices during peak times

Shift Non Essential usage After-Hours - Reduced energy costs, better "green" image for your company / reduce carbon footprint

Better Emergency Power Usage - Increased ability to control devices when on back-up power
