

# Oil and Gas Application

## Problem:

Large distances between wells / sites

Worker safety at remote locations / travel

Limited information - lost revenue and long possible downtimes

## Solution:

SIXNET's R.A.M. allows for real-time monitoring of oil wells and pipelines

R.A.M. is flexible and reliable

## Benefits to you:

Reduced On-Site Visits - Lower Vehicle, Fuel and Labor Costs

Real-Time Information / Outage Notification - Reduced Downtime / Increased Cash Flow

5 Ethernet Ports Available - Maximum flexibility to run multiple applications (such as an IP video camera)
